#717-582-8988 ext. 4**

CONIFER TREES—BAREROOT, SOLD IN BUNDLES OF 10

Eastern White Pine

(Seedlings arrive 10"-16" inches tall) Fast growing to 100 feet. A five-needled pine, with soft 4 in. light green-blue needles. Makes an excellent ornamental as well as a Christmas or timber tree. Pines respond well to pruning and grow well in a wide variety of soils.

Colorado Blue Spruce

(Seedlings arrive 5"-10" inches tall) Grows 60 to 100 feet. Produces stiff silver-blue needles about 1 inch in length. Known as the 'king of ornamentals' it will create great windbreaks if planted densely. Can tolerate most soil types and prefers low to medium moisture.

Norway Spruce

(Seedlings arrive 10"-20" inches tall) Grows to 75 feet. Shiny, dark green 1 in. needles on spreading branches. Hardy trees that are successful in most conditions. Suited for Christmas tree use and as an ornamental evergreen. They are also form protective windbreaks.

DECIDUOUS TREES—BAREROOT, SOLD AS SINGLE SEEDLINGS

(will arrive in a range of sizes between 5"-30" inches tall)

Sugar Maple

Grows to 60 feet. This tree provides food for songbirds, quail, turkeys, chipmunks, squirrels, and other wildlife in addition to maple syrup for a tasty treat. Prefers moderately-drained soils. Using a 48" inch shelter is recommended.

Sawtooth Oak

Grows to 70 feet.
Produces leaves 4-10 inches wide.
Bears a significant number of acorns, deemed as a high biomass food source for wildlife. Prefers moderate to well-drained soils. Using a 48" inch shelter is recommended.

American Plum

Considered a small tree, grows to 30 feet.
Flowers are white and grow in small clusters. Blooms from April to June. Will bear edible fruit in yellow-pink/red color, skin is thick and tart but the flesh is juicy and delicious. Bark appears shaggy/spikey. Using a 48" inch shelter is recommended.

SHRUBS—BAREROOT, SINGLE SEEDLINGS

American Hazelnut

Considered a shrub, grows to 10 feet. Flowers from April to May, bears edible nuts enclosed by ragged-edged husks from July to September which are suitable for consumption by humans and wildlife. Can grow in a wide range of soils and in partial to full sun. 24" inch tree shelter suggested.

Witch-hazel

Considered a shrub, grows to 20 feet. Produces wavy-toothed leaves and large seed pods. Flowers are yellow, blooms from September to November. Fruit pops out of pods August to October. Is considered excellent forage for wildlife. 24" inch tree shelter suggested.

WILDFLOWER SEEDS

*Seed packet coverage = 1 oz./125 sq.ft, 8 oz./1,000 sq.ft.

Northeast Perennials and Annuals Mix:

This wildflower mix consists of 30 different species, containing a 1/3 mix of annuals and a 2/3 mix of perennials of both native and naturalized species that provide color throughout the year. Seeds should be spread in sunny locations.

Butterfly and Hummingbird Seed Mix:

This 29 variety mix produces a diverse variety of annual and perennial flowers in a wide range of vibrant colors, including grasses for cover, that are designed to attract pollinators. Pollinators will benefit from this addition of habitat and will enhance your garden landscape.

2023 ORDER FORM
Please return this form with a check payable to:
Perry County Conservation District
Addressed to:
31 West Main Street
P.O. Box 36
New Bloomfield, PA 17068

BY MARCH 22, 2023

THANK YOU FOR YOUR SUPPORT!

Orders are subject to availability. All seedlings must be purchased by placing a prepaid order. If any one species is sold out, the District will refund payment for those seedlings not available. All seedlings are sold as bareroots and their survival rate varies from site to site, from excellent to poor. We strive to provide the most viable seedlings available and all efforts are made to handle the seedlings in a manner that minimizes root stress. The Perry Conservation District will not ensure successful plantings of bare root seedlings, just as our suppliers will not assure seedling survival. **The District is not responsible for orders not picked up by 6P.M. on April 13, 2023.**

Seedling Care: Do not allow the roots to become dry at any time! Plant seedlings as soon as possible after you receive them. Put the trees in a cool, dry place out of direct sunlight. Do not allow seedlings to freeze or to get above 60 to 65 degrees. If you need to keep the seedlings for a longer period of time, dig a trench in the ground deep enough to cover the roots, place seedlings in trench and cover roots. Be sure to compact the soil so that there are not any air pockets. The seedlings will need to be watered about once per week to make sure they do not dry out. Addition of fertilizer and plant vitamins at the time of planting generally is **not** necessary.

1. Dig a hole twice the size of the roots and deep enough to hold all of the roots.
2. Place the tree in the planting hole as shown in the picture.
3. Fill in the planting hole with soil around the roots. Pack tightly.
4. Place straw or wood mulch around the base of the tree to help keep moisture in.
5. Water the tree well. Give your trees a good soaking with water once a week.
6. Provide protection for your trees with stakes or shelters to prevent damage.

HABITAT ENHANCERS

Oats—Cover Crop Seed

Great for gardeners! When planted after the fall harvest, oats will ‘winter kill’ and provide nutrients and residue for garden plots and raised beds, keeping microbial life fed in the soil over the cold months in prep for spring planting. Oat residue can also be turned under, acting as compost organic matter. The perfect primer for the next production year.
Sold by the pound.

Blue-X Tree Shelters

Comes in both 24" and 48" lengths. These durable, lightweight shelters last for years and give new seedlings needed protection against wildlife while also letting sunlight in for healthy growth. Very quick and easy set-up. **Highly recommended** to be used with seedlings planted in areas with high deer pressure. Wooden stakes are also available for purchase.

Bluebird Boxes

These locally hand-built wooden boxes (*built by the West Perry FFA*) feature an over-hanging roof and a recessed bottom with slots for dryness. They also have a swivel front opening for easy cleaning. Attach your box 4-6 feet high on a post facing the nearest tree or shrub, at least 100 yards away from other bird boxes.

PERRY COUNTY CONSERVATION DISTRICT

2023 Tree Seedling Sale

Proceeds from the tree sale will be used to fund environmental education programs sponsored by the Perry Conservation District. **THANK YOU FOR YOUR SUPPORT!**
